L3 ANSWER 2 OF 73 EUROPATFULL COPYRIGHT 2002 WILA

DETDEN. . . those materials obtained from the genus *Camellia* including *C. sinensis* and *C. assamica*, for instance, freshly gathered tea leaves, fresh **green tea** leaves that are dried immediately after gathering, fresh **green tea** leaves that have been heat treated before drying to inactivate any enzymes present, unfermented tea, instant **green tea** and partially fermented tea leaves. **Green tea** materials are tea leaves, tea plant stems and other plant materials that are related and which have not undergone substantial fermentation to create black teas. Members of the genus *Phyllanthus*, catechu gambir and **Uncaria** family of tea plants can also be used. Mixtures of unfermented and partially fermented teas can be used.

SUMMARY LANGUAGE: English
AB The Indians of the northwest Amazon respect age and try to care for those suffering from senile dementia. At least 25 species of plants are employed in treating **Alzheimer's** disease or similar problems. The plants are administered orally as teas of the leaves or roots and over a period of several days to numerous weeks. The plants are from 15 phanerogamic families. Little chemistry is known of most of the species. In view of the current interest in **Alzheimer's** disease and related problems these species might profitably be investigated.
